Work of the Natiors.

A compilation of the fielding and bat-A compliance of the warming and the Natiers shows an improvement in both departments as compared with two weeks ago, when the Intelligence published the averages. True, the teams that have opposed the Natiers have batted Wheeling's twirlers pretty bard, much harder, in fact, than Wheeling's batemen have been able to connect with the pitchers of the other teams, but will be noticed by the careful observer that Wheeling has almost invariably been been on close scores. At least this has been the rule during the past fortnight. In fielding, the locals have picked up materially and are again on a par with eposing teams. Their well known superiority in fielding should from now on send the team ahead of opposing teams in this department of the game, and there is no doubt but that when the boys strike their true batting gait they will cut a few notches themselves.

Fielding Averages. Fielding Averages.

In fielding, the three new recruits, Vet ters. Toft and Burnett have so far playters. Toft and Burnett have so far played without a misplay, and are therefore the for first position in the averages. O'Brien comes next with the magnificent average of .882, which is pretty hear the best helding game any first-baseman in the country is putting up. For a reliable initial bagman it is difficult to name the equal of popular "Tom" O'Brien, and Wheeling fams are loath to helieve that his superior has been born into the game yet. He may arrive with the bissful age when the umpire is a popular individual and the free silver rank has become a fossil, but not before. Messett's work behind the bat, too, is worthy of all praise. In addition to having a fine average, Wheeling admirers like the little fellow for the willingness with which he went behind as bat day in and day out week after week when Wheeling had no other catcher to alternate with bim. Although suffering from two bad fingers, Messett caught frry-three games straightaway and never mentioned the fingers to the management of the team. Such a player is a fewel of great price and Wheeling is fortunate in having the young man on her staff. The fielding figures: ed without a misplay, and are therefore nate in having the young man on

Batting Averages.

In batting a new Richmond has appeared. Bill Taylor led the Nailers al-most from the beginning of the season, most from the beginning of the season, his average two weeks ago being .440, but now Sammy Vetters has wrested the leadership from the hard-working and well liked short-stop, having an average of .478. Some do not realize what these figures mean. They mean that Vetters has made a safe hit almost every other time he came to bat. This is terrine stick work and the army of cranks are hoping the ex-Springfielder can keep up the pace—and it is one that will kill the pitchers that are unfortunate enough to rin up against it. Taylor is in second position, with .396, and then come O'Brien, Tots, Coyle, Campbell and Lyons, all in the .390 division. The figures:

to Attend the Encampment.

Members of Shriver Grays Camp, United Confederate Veterans, and of the camps at Parkersburg, Huntington, Charleston and other towns in the state are preparing to attend the annual reunion at Nashville this menth, Traveling Passenger Agent Ashby Smith, of the Onio River railroad, who was in town yesterday, says the West Virginia delegation of veterans of the gray will be very large, the low rate of transportation and the exposition at Nashville making the trip unusually at-

Nashville making the trip unusually attractive.

General John H. Gordon, ex-United States senator from Georgia, whose visit to Wheeling on the occasion of his lecture two years ago, is pleasantly remembered, is the commander-in-chief of the veterans, and issued, yesterday, the following letter:

"To my Confederate Comrades:—It was my proud privilege to announce, officially, a few days ago that a thousand camps have been incorporated into the "United Confederate Veterans," a glorious brotherhood organized for non-partisan and noble ends. All these camps will be represented, I trust, in our annual re-union at Nashville. This remarkable growth of our organization must be to you a source of sincere pride and pleasure. It will be welcome news to brave and magnanimous men in every section of our country, who comprehend its philanthropic and patriotic aims. To me it is a source of profound gratification that our brotherhood has reached its present vast proportions during the years in which you have so

gratheation that our protherhood have so steadfastly and with such unparalleled unanimity honored me with the position of commander-in-chlef. This growth is the more remarkable because it has occurred in an organization which has no partian purpose to stimulate its efforts, and no cohesion of sectional passion or selfish alms to bind it together. While eliminating from its life all narrow prejudices that tend to dwarf its manhood, and while inspired by a sentiment most helpful to the harmony of the sections and the well being of the republic, this representative body of ex-Confederate soldiers is resolved to guard through the potent agency of impartial history, the self-respect of our people and to conserve the manhood of southern youth by transmitting, not the passions, but the hallowed memories of a marvellously heroic struggle.

"Such a success could never have been attained except by the carnest cooperation of the able commanders of departments and divisions, and of their co-workers in the camps. But them in according to General George Moorman, my chief of staff, the largest share of bonor in the achievement of this great result. It is but simple justice to this superb staff officer to say that in all these years of upbuilding, of anxlety, and of labor, often amidst difficulties and discouragements of the gravest character, he has given his time, his thought, his energies and his talents, ungrudgingly and without a dollar of compensation to the arduous task imposed upon him by the duties of his office; and to amount of work for the welfare of the organization has been too onerous or exacting for him to cheerfully and efficiently perform.

"In announcing this gravifying success I wish to make my most grateful acknowledgements to my comrades of every rank, in every state. While it has been due of the chief pleasures, as well as highest honors, of my life, to serve in the station to which your partiality has so repeatedly called me, and while I shall ever cherish the numberless evidences of your confidence, ye

The murderer who, at dead of night, creeps, stealthily out to bury the dead and mangled body of his victim inspires men with horror and dread. There is a murderer abroad who yearly slays one-sixth of all the human race who go down to untimely deaths. This dread monster is called consumption. The approach of consumption is slow and insidious. First there is a slight disorder of the digestion. The appetite is poor and the nourishing properties of the food are not properly assimilated. The blood becomes thin and impure. The body begins to starve. Old tissues of the body are not properly replaced by new. The lung tissues are not properly nourished and are inert and half dead. In this condition they offer a good soil for the germs of consumption which invade and attack them.

This operation is promptly reversed by Dr. Pierce's Golden Medical Discovery. It invigorates the digestion and appetite and makes assimilation perfect. It builds up and purifies the blood. It makes new and healthy tissue to replace the old, inert matter which it causes to be carried off. It drives out all disease-germs. Thousands of cases given up as hopeless have been cured.

dence in Poorman as he has in that party.

John Cratty, who has been spending a few days with his aunts', the Misses Cratty, in the Fourth ward, has left for Columbus, where he graduates Thursday from the Ohio State University. He leaves Columbus Friday for Cincinnati, where he has accepted a position in the Ohio State Food and Dairy department. There is some talk of the establishment of a manufactory here that produces electrical novelties. A gentleman representing the firm has been tendered a good site alongside of a railroad, and they may decide to accept it but nothing definite has been done.

There were two drunks confined in the city bastile yesterday, one a colored woman. Another one had been released early in the morning, as it was his first offense, but he had been picked up in a vacant house on a prominent street vary late at night.

About sixty Bellaire people went to Columbus yesterday morning on the B. & O. excursion that was run from St. Clairsville Junction. The train returning got in shortly after midnight.

H. C. Kemple, commander of Spangler post, W. H. Thompson and wife and Mrs. C. Hippus will leave to-day for Chillicothe to attend the G. A. R. encampment there.
